-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Peyrelevade et al (US 2001/0120550 A1).

Peyrelevade et al teach a system including the steps of: at least one reseller's electronic site, each such site arranged to display information pertaining to products that are selectable by a user, said products provided to said reseller from a source independent (third party) from said reseller (page 9, [0102], lines 5-9); at least one database (fig. 3, 3600) controlled by said independent source (third party), said database (fig. 3, 3600) arranged to contain information specific to said source's modules that are displayable to said user via said reseller's electronic site (page 6, [0070], lines 1-3); and at least one communication link 2300 controlled jointly by said source and said reseller (fig. 2), the link responsive to a request for updated data and for accessing said database to provide the latest version of the requested data to a database controlled by said reseller (page 3, [0041], lines 1-19), a system wherein said source-controlled database can communicate to a plurality of databases, each controlled by a different reseller (fig. 3), wherein further comprising means for causing the distribution of product data to a plurality of reseller's electronic sites, such that the product data will be uniformly displayed to an accessing

Art Unit: 3627

user regardless of which one of said plurality of reseller's electronic sites said user accesses (page 11, [0127], lines 1-6), and wherein further comprising: at least one second communication link established from said source database to an accessing user at a reseller's electronic site such that said accessing user may receive certain data directly from said source database while said accessing user remains in communication with said reseller's electronic site, said second communication link independent from said first-mentioned communication link (page 5, [0061], lines 1-8). Peyrelevade et al teach establishing a transactional relationship between a user and said reseller (fig. 3, 2300); receiving from said user a specific request; and communicating said user's request to said source (third party, fig. 3); and said method further including the steps at said source of: receiving user requests from said resellers; and directly fulfilling each said request from said source to said user while still maintaining said established transactional relationship (fig. 3), wherein said maintained transitional relationship controls of payment between said user and reseller (page 9, [0110], lines 1-7).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Stromberg (US 2002/0007322) teaches a system and method for providing supplemental products-specific information without interfering with the commercial transaction at the point of sale.
- Pertila et al (US 2004/0087273) teach a method and system for selecting data items for service requests.

Art Unit: 3627

- Yu et al (US 2003/0009395) teach a method and apparatus for providing information regarding a product.
